Reel Vadodara

To spread awareness on Human Rights and Due Diligence, Nukkad Natak (street plays) were conducted across all our program villages. These performances effectively engaged community members and helped create greater understanding and awareness on the subject. Additionally, to promote safety during crop spraying, Personal Protective Equipment (PPE) kits were distributed to program farmers. This initiative aims to ensure safer farming practices and protect farmers' health while working in the fields.

Reel Farmer Pool Program

Under the Reel Project, Amreli Head Office organized a discussion session on the topic of “Environment Friendly Farming” for farmers involved in bio-input, in which group activities were conducted on soil health, chemical and natural farming cost comparison. After that, they visited Prakriti Krishi Mahavidyalaya - Amreli and got practical understanding about the five dimensions of natural farming, bio-fertilizer, indigenous seeds, five-tier model farm and rain drop irrigation system.

During the month, activities such as farmer identification and biochar training for biochar, distribution of water testing reports, distribution of 15 deworming kits for animals and visits to bio-input farmers were carried out in the program. Under convergence activities, biochar preparation was carried out in Goghavadar and Sandhvaya villages to promote sustainable soil management practices.

Center for Learning Assistance

Across our four learning centres, mentors conducted several creative activities as part of daily teaching. Students enthusiastically participated in “Best Out of Waste” projects by creating model homes from recycled materials. They also made toys and small utensils using clay, encouraging creativity and hands-on learning.

On 14th February, Mansiben visited the Mota Machiyala Learning Centre. Out of 25 students, 19 were present due to the wedding season. Students confidently introduced themselves in English and Gujarati and an interactive game conducted during the visit made the session engaging and enjoyable.

A visit was organised for CLA classes of Bherai, Kovaya and Bhankodar villages on 28th February 2026 and knew from children about their learning.

Gender Education

We are pleased to share that the Foundation Course of our Gender Education Program has been successfully completed. To mark this milestone, a “Gender Education and Action Leadership” meet was organized on 22nd February 2026 at Khadadhar, Bapano Dungar, bringing together adolescents from three villages. Throughout the day, students actively participated in various engaging activities and demonstrated their learning and leadership skills. The program concluded with the distribution of course completion certificates to all participating students, celebrating their dedication and achievement.

On 23rd February, 2026 at the Head office of the organisation meeting was organised to prepare a detailed Annual budget of FPO for the year 2026-27. The meeting reviewed on a case-by-case basis and a detailed budget format for 2026-27 was prepared with consensus. This format includes complete planning details of income, expenditure, profit and loss and cash flow, which will prove to be a guide for the business and financial management of the FPO.

Writeup sessions

Staff members meet virtually to share their reports and receive constructive feedback on writing skills and report formatting. These sessions help strengthen documentation quality and enhance communication across the organization.

On 03/02/2026, the team discussed the report on the exposure visit to Junagadh Agriculture University along with a field success story highlighting the benefits of establishing an Anaerobic/Biogas Tube for bulk production of Jivamrut.

On 17/02/2026, discussions included two field success stories and reports on the Monthly Review and Planning Meeting, Patan Workshop, Reliance Foundation Partner Profile and the Breast Cancer Awareness and Screening Camp.

Reading Session

On 06-02-2026, a reading session was conducted on the topic “Diagnosis before Treatment.” The story “Our Daughter” by Stephen Covey was read and discussed, and participants connected its ideas with real-life experiences. It was also decided that in the next session they would read “Selling Solar-Powered Water Heaters” and relate it to their own life work. On 13-02-2026, the discussion focused on the idea that learning is a voluntary choice. While books can be read, true understanding comes from life experiences. Learning is a lifelong process, and one must be willing to make efforts and pay the price to truly learn. On 20-02-2026, the session followed an autobiographical approach, encouraging participants to reflect on their personal experiences and engage in self-reflection.
